

OrbitalOptimization

```
graph TD; A[OrbitalOptimization] -- 1 --> B[Basis]; subgraph A [OrbitalOptimization]; C[Localization]; end
```

The diagram illustrates a process flow. At the top, a light blue rectangle with a dashed border contains the text 'OrbitalOptimization'. Inside this rectangle is a smaller, solid black-bordered rectangle containing the text 'Localization'. A blue arrow points downwards from the 'Localization' box to a light blue rectangle with a dashed red border at the bottom, which contains the text 'Basis'. The number '1' is positioned next to the arrowhead.
