

/\_\_w/GQCP/GQCP/gqcp  
/include/QCMethod/QCStructure.hpp

```
graph TD; A["/__w/GQCP/GQCP/gqcp  
/include/QCMethod/QCStructure.hpp"] --> B["stdexcept"]; A --> C["vector"];
```

The diagram illustrates a file inclusion relationship. A top-level box contains the file path `/__w/GQCP/GQCP/gqcp/include/QCMethod/QCStructure.hpp`. Two blue arrows originate from the bottom of this box, pointing to two separate boxes below. The left box contains the text `stdexcept` and the right box contains the text `vector`, indicating that the top-level file includes these two headers.

`stdexcept`

`vector`
