

/\_\_w/GQCP/GQCP/gqcp  
/include/Utilities/memory.hpp

```
graph TD; A["/__w/GQCP/GQCP/gqcp  
/include/Utilities/memory.hpp"] --> B[cstdintdef]; A --> C[memory]; A --> D[type_traits]; A --> E[utility];
```

The diagram illustrates a directory structure where a header file, `/__w/GQCP/GQCP/gqcp/include/Utilities/memory.hpp`, is associated with four other utility headers: `cstdintdef`, `memory`, `type_traits`, and `utility`. Arrows point from the main header box to each of these sub-header boxes.
