

NumTraits< double >

The diagram illustrates an inheritance relationship. At the bottom is a gray-shaded box representing the base class, `Eigen::NumTraits< GQCP ::EvaluableLinearCombination < Coefficient, FunctionType > >`. A blue arrow points upwards from this box to a white box above it, representing the derived class, `NumTraits< double >`. The white box has two empty rectangular sections below its header. The gray box also has two empty rectangular sections below its header.

Eigen::NumTraits< GQCP
::EvaluableLinearCombination
< Coefficient, FunctionType > >
