

NumTraits< double >

```
classDiagram
    class NumTraits_double["NumTraits< double >"]
    class Eigen_NumTraits["Eigen::NumTraits< GQCP::EvaluableLinearCombination< Coefficient, FunctionType > >"]
    Eigen_NumTraits --|> NumTraits_double
```

The diagram illustrates an inheritance relationship. At the top is a class box for 'NumTraits< double >' with three empty compartments. Below it is a larger, shaded class box for 'Eigen::NumTraits< GQCP::EvaluableLinearCombination< Coefficient, FunctionType > >'. A blue arrow with an open triangular head points from the bottom of the shaded box to the bottom of the top box, indicating that the shaded class inherits from the top class.

Eigen::NumTraits< GQCP
::EvaluableLinearCombination
< Coefficient, FunctionType > >
