

NumTraits< double >

```
graph BT; A["Eigen::NumTraits< GQCP  
::EvaluableLinearCombination  
< Coefficient, FunctionType > >"] --> B["NumTraits< double >"]
```

The diagram illustrates an inheritance relationship. At the bottom is a grey rectangular box representing the base class, `Eigen::NumTraits< GQCP ::EvaluableLinearCombination < Coefficient, FunctionType > >`. A blue arrow points upwards from this box to a white rectangular box at the top representing the derived class, `NumTraits< double >`. The white box is divided into three horizontal sections, with the top section containing the class name. The grey box is also divided into three horizontal sections, with the top section containing the base class name.

Eigen::NumTraits< GQCP
::EvaluableLinearCombination
< Coefficient, FunctionType > >
